DATABASE

## How to access endoscopist data and key performance indicators (KPI's) on the National Endoscopy Database

Hosted by

 Royal College of Physicians

The National Endoscopy Database (NED) automatically uploads non patient identifiable procedural data that has been added to endoscopy reporting systems from participating sites. These data are analysed to produce key performance indicators (KPIs) that can be used by individual endoscopists.

This guide outlines how an endoscopist can gain access to their own data in NED and use it for appraisal and revalidation.

## Accessing NED

Login by clicking on Login button on homepage.

### Welcome to NED the National Endoscopy Database

The National Endoscopy Database (NED) is populated by data extracted automatically from the endoscopy reporting system (ERS) at endoscopy services in the UK. The NED makes data available in user friendly outputs for clinicians, services and for research purposes.

The aim of the NED is to:

- Support and enable improved quality assurance in endoscopy
- Enhance JETS (JAG Endoscopy Training System) removing the need for double data-entry for trainees
- Offer potential for research by providing a central store of key endoscopy data

The endoscopy reporting software suppliers involved in the project and their progress towards being NED compliant can be found in the [resources tab](#).

The NED is being developed by JAG with support of several other societies and colleges.

Logon to NED [Forgot password?](#)

[Login](#)

If you have a JETS account, please log in with your JETS user name and password. If you don't already have a NED/JETS account, [register for one here](#).

Procedures Loaded per Month

Total Procedures Loaded into NED

Sites uploading to NED

If user has an account on JETS, use JETS username and password to login.

If user is not already registered on JETS, register for an account, but clicking on 'register for one here' link and completing the short online form.

The screenshot shows the 'Login to NED' interface. At the top right is a link for 'Forgot password?'. Below this are two input fields: the first is labeled 'username or email' and the second is labeled 'password'. A green 'Login' button is positioned below the password field. At the bottom of the form, there is a paragraph of text: 'If you have a JETS account, please log in with your JETS user name and password. If you don't already have a NED/JETS account, [register for one here.](#)' Blue arrows point from the text on the left to the 'username or email' and 'password' fields, and from the text on the right to the 'Forgot password?' link. Another blue arrow points from the text on the left to the 'register for one here' link in the bottom text.

JETS username/  
password reminders  
can be generated by  
clicking on the  
'Forgot password?'  
link on the login  
screen.

## Using NED

The homepage provides a dashboard of core KPIs for OGD, Flexible sigmoidoscopy, colonoscopy and ERCP (full ERCP functionality is not yet available).

The site (if working at multiple hospitals), procedure and date range can be filtered using the drop down menus.

Changing the 'Date Order' (using the Date Order button) can make the data easier to read.

More in depth KPIs can be seen by selecting the 'All KPIs' tab and a particular procedure type.

KPI	2017 Q1	2017 Q2	2017 Q3	2017 Q4	2018 Q1	2018 Q2	2018 Q3	2018 Q4
Procedure Count								
D2 Intubation rate								

The traffic light system compares users performance against national benchmarks (where minimum standards or targets have been published).

- Green = above aspirational targets
- Amber = between minimum standard and aspiration targets
- Red = below minimum standard

KPI	2017 Q1	2017 Q2	2017 Q3	2017 Q4	2018 Q1	2018 Q2	2018 Q3	2018 Q4
Procedure Count								
D2 intubation rate								
J manoeuvre rate								
Median dose of Pethidine								
Median dose of Pethidine >=70								
Median dose of Midazolam								
Median dose of Midazolam >=70								
Median dose of Fentanyl								
Median dose of Fentanyl >=70								
Unsedated Procedures								
Greater than recommended dose								
Comfort Score								

Compare performance to other endoscopists in organisation using a funnel plot by clicking on and individual KPI or the 'Plot KPI' tab. Other endoscopists in your organisations appear as anonymised 'dots' on the graph. Definitions for the limits and standards are presented below the graph.
